Subject: RE: Revised Draft Source Control Proposed Plan - Wilcox Oil Company
Date: Wednesday, January 31, 2018 8:35:42 AM

Hi Katrina,

I gave this a quick scan rather than an in-depth review. Given that the CUL will change to 400 rather than a range, my only comment is that the second RAO initially said to prevent migration and has now been changed to prevent environmental degradation. I would recommend sticking with the prevent migration language.

Thanks!

Christine

Subject: FW: Revised Draft Source Control Proposed Plan - Wilcox Oil Company

All, the lead consultation discussion was held with HQ this morning. We have support, and I need a tweak the proposed plan to show that the target cleanup level for lead is 400mg/kg instead of a range of 200-400 mg/kg.

Please keep this in mind as you look over the document.

Also, I request any further internal comments by Wednesday, January 31, 2018. The proposed plan needs to be provided to the state and tribes for review in February (consultation with tribes as well).

thanks

Subject: Revised Draft Source Control Proposed Plan - Wilcox Oil Company

All, please see the revised draft of the Source Control Proposed Plan for Wilcox Oil Company. The Division Director Briefing is scheduled January 24. After this meeting, final preparation activities for public release will follow.

Here are action items that remain (listed in no particular order).

- Tribal consultation (target February)
- PPlan Administrative Record (target February)
- ODEQ coordination (target February)
- Lead consultation with HQ: call scheduled for January 25
- Public meeting (target April)

Please note that formatting with the tables and text boxes will be completed after the

document is draft final. This makes editing easier.
